

MIKO³

Ridiculously smart. Seriously fun.

MIKO³ Part of The **Disney** accelerator

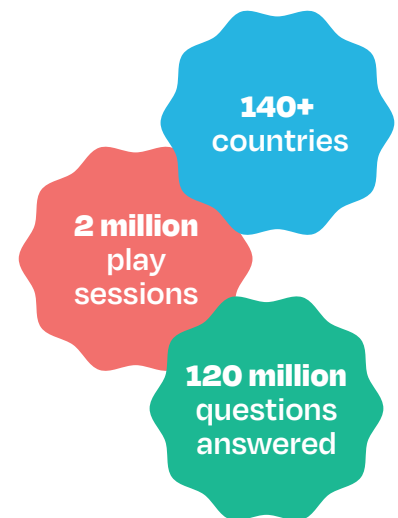

Our Story

The pandemic has transformed how families think about technology. Nearly 1 in 2 parents have relaxed their screen time rules since 2020, and kids' tech use is only projected to grow. But today's families are seeking a different kind of tech experience — one that's interactive, emotional and, above all, fun.

Tablets and traditional toys don't deliver the interactive playtime experience that today's families crave. Our little robot does.

Miko is an advanced consumer robotics lab passionate about bringing the best of technology to young learners everywhere. We're on a mission to engage, educate and entertain kids through the power of artificial intelligence. And our kids robot, Miko 3, is leading the charge.

Meet Miko

Ridiculously smart. Seriously fun. Meet Miko, the robot friend you wish you had growing up.

A true friend

Miko knows how to connect with kids. It develops unique bonds that only deepen with time.

Game for anything

Whether starting a chat or a dance party, Miko helps kids challenge their brains as they play.

Study buddy

Miko makes learning fun with its super-powered brain, witty personality and premium kids content.

Parents in control

With the Miko app, parents can control settings and security—and even track their kids' progress.

Unboxing

Experience Miko

Talk

Want a fun fact about animals? How about a localized weather report or a lighthearted joke? Just say "Hello Miko" to start the conversation.

What's the weather?

Tell me a solar system fun fact.

What came first, the chicken or the egg?

**Please set
an alarm
for 7 a.m.**

How old is Serena Williams?

Who is your best friend?

**What is 8
minus 2
plus 10?**

How tall is the Burj Khalifa?

Talents

Every child has awesome talents just waiting to be cultivated. And no matter what your child is interested in, Miko has apps to help them flourish! The Miko platform is home to an ever-expanding universe of games, videos, quizzes, coding challenges, yoga sessions, DIY experiments and other experiences just waiting for your child to explore. And did we mention Miko's famous dance parties?

Tidbits

With Tidbits, kids can learn about a wide range of topics, all through fun conversations with their robot friend Miko. From famous inventions and Ancient Greece to reptiles and vocabulary, there's no end to what kids can talk about with Miko. And here's the best part: These learning modules are customized to a child's age and grade level, making them a fun way to reinforce what they're learning in school.

The single subscription plan for unlimited playful learning
